Virtual Convoy Combat Trainer (VCCT) is a training simulator. The VCCT is a suite of four Humvees outfitted with armor and weapons that replicate the vehicle configurations crews actually used in the field. The simulators are housed in 53-foot trailers that can be easily moved from one location to another to provide training for deploying troops. The system uses detailed databases that give students a stunningly realistic depiction of what they will encounter in the battlefield. In some cases crews have trained on the actual routes they traveled with their convoys. (Approximately 1-2 hours)

Indoor Simulated Marksmanship Trainer (ISMT) is a training simulator. It is used as a tool to train shooters in the fundamentals of marksmanship (Approximately 1-2 hours).

In between we will have a taste of Quantico chow hall's outstanding cuisine.
